### AsthmaPal

1 year 6 months

#### CEO

September 2018 - February 2020 (1 year 6 months)

Serbia

### Founder

September 2018 - February 2020 (1 year 6 months)

Serbia

AsthmaPal is a mobile application that is predicting the risk of getting an asthma attack. As a founder and a part of a core team, I mainly steered decisions regarding product features, business models, pivoting, and underlying architecture. After almost one and a half years of sheer sweat and blood, we decided to put a key in the lock and wait for a more stable investment market.

### HomeHunter.rs

#### Co-Founder & Full-stack developer

February 2017 - June 2018 (1 year 5 months)

HomeHunter is an app that will show you all real-estate that are on the market from all real-estates sites in Serbia and also notify you if new real-estate appears on the market that matches your needs.

Devana Technologies

Software Engineer Intern

June 2016 - August 2016 (3 months)

Belgrade

I was part of a team that worked on project called Real-time action map. Our job was to create a map that will show all action that occurs on customer website, everything from clicks, logins and server communication. We used NodeJS, PHP(Laravel 5), Redis, D3.js, HTML5/CSS3, SSL.

---
